The simple answer for renters who want solar panels for their apartment or house is that it's possible!

What are the benefits of solar panels on a rental property?

Another benefit of solar panels on a rental property is the increase in property value. Advanced technology such as solar panels can attract more interest, especially from environmentally-conscious renters.

How do I choose a solar panel system for my rental property?

Roof Space: The available roof space on your rental property will determine how many solar panels you can fit onto it, which affects the overall capacity of your solar panel system. **Budget:** Your budget plays a significant role in deciding how big or small you want to go with a solar panel system installation.

Can a landlord install a solar panel system?

While you may be able to pitch your landlord to install a rooftop solar panel system, community solar is more likely to be your best bet to enjoy the benefits of solar if you don't own your roof space through incentives like virtual net metering, community solar participants can earn credits back on their electricity bill, saving money every month.

Can solar panels be depreciated on a rental property?

Generally, solar panels installed on a rental property can be depreciated as a capital improvement, allowing you to recover some of the installation cost and reduce your tax liability. This is typically done by spreading the cost of the solar panels over their useful life, according to the tax laws in your jurisdiction.
