

Household solar power subsidies

Will low-income households get affordable solar energy?

SIMON: Nothing. SALAS: (Speaking Spanish). SIMON: Soon, more low-income households like his will get affordable solar energy. A new Environmental Protection Agency program is giving \$7 billion to programs that fund rooftop solar panels, batteries to store solar energy and something called community solar.

What is the \$7 billion solar for all program?

Oops, something went wrong. Check your browser's developer console for more details. Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

What is the Federal residential solar energy credit?

The federal residential solar energy credit is a tax credit that can be claimed on federal income taxes for a percentage of the cost of a solar PV system paid for by the taxpayer. (Other types of renewable energy are also eligible for similar credits but are beyond the scope of this guidance.)

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.

Can you get tax credits for solar power?

Several states also offer tax credits for solar power. People who install solar in participating states earn extra money back on their state income tax bill the year after installation. All state solar tax credits can be claimed in addition to the federal government's investment tax credit.

Are solar panels tax deductible?

Under most circumstances, subsidies provided by your utility to you to install a solar PV system are excluded from income taxes through an exemption in federal law. When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit.
