

How to generate pure electricity from solar energy

How is solar energy generated?

Solar energy - Electricity Generation: Solar radiation may be converted directly into solar power (electricity) by solar cells, or photovoltaic cells. In such cells, a small electric voltage is generated when light strikes the junction between a metal and a semiconductor (such as silicon) or the junction between two different semiconductors.

Is solar power the cheapest way to generate electricity?

If you are looking into options for making your house more eco-friendly and saving some money, solar power is probably one of the most attractive renewable energy options. In fact, solar power is becoming the cheapest way to generate electricity, according to Bloomberg New Energy Finance analysts.

How can we use sunlight to generate electricity?

And there is another way to use this abundant energy source: photovoltaic (photo = light, voltaic = electricity formed through chemical reaction) solar cells, which allow us to convert sunlight directly into electricity.

Should you use solar power to generate electricity at home?

Using solar power to generate electricity at home is a very appealing option for a number of reasons: not only would you be reducing your overall environmental footprint and greenhouse gas emissions, but you would be reducing your bills and could even generate some income by selling back excess energy into the grid.

How do photovoltaic solar panels generate electricity?

An electric current is created when enough electrons are stimulated. Depending on the material, the frequency necessary to trigger the effect can vary. In photovoltaic solar panels, semiconductors are the photoelectric medium used to convert sunlight to electricity.

How does solar power work?

The sun--that power plant in the sky--bathes Earth in ample energy to fulfill all the world's power needs many times over. It doesn't give off carbon dioxide emissions. It won't run out. And it's free. So how on Earth can people turn this bounty of sunbeams into useful electricity?
