

New Energy Storage Team Slogan

Should energy storage be co-optimized?

Storage should be co-optimized with clean generation, transmission systems, and strategies to reward consumers for making their electricity use more flexible. Goals that aim for zero emissions are more complex and expensive than net-zero goals that use negative emissions technologies to achieve a reduction of 100%.

How can energy storage technology improve resiliency?

This FOA supports large-scale demonstration and deployment of storage technologies that will provide resiliency to critical facilities and infrastructure. Projects will show the ability of energy storage technologies to provide dependable supply of energy as back up generation during a grid outage or other emergency event.

What does OE's new NOI mean for energy storage technology developers?

OE has announced an NOI for \$8 million in funding for up to four projects to address manufacturability challenges that energy storage technology developers face when making design decisions that impact production of the technology, including scaling.

Which non lithium energy storage companies did a weak 3rd quarter results?

Eos, ESS Tech Inc and Energy Vault, the three big-name non-lithium energy storage firms that listed via SPAC deals, saw weak third quarter results. The US battery storage system integrator arm of Korean battery manufacturer LG Energy Solution (LG ES) has signed a 4-year supply deal with developer Terra-Gen.
