How do you install a protea bracket on a metal roofing panel?

The ProteaBracket is mounted directly onto the crown of the roofing panel, straddling the profile. No surface preparation is necessary. Peel adhesive backing and apply bracket to the metal roofing panel.

What types of roof racking systems work with a classic conduit Mount?

Works with all standard curved and flat tile roofs, and all standard rail-based racking systems. The Classic Conduit Mount lifts electrical conduit off the roof to protect wiring from overheating. These mounts use our proprietary waterproofing technology to seal the roof penetrations.

Does the proteabacket come with a rubber sealant?

The ProteaBracket comes with a factory-applied EPDM adhesive rubber sealant on the base that ensures quick weather-proof installation. There are no messy sealants to apply and no chance for leaks. The factory applied adhesive rubber sealant ensures quick installation and a weather-proof fit.
