

Tongwei photovoltaic panel 600w model

Who is Tongwei module?

With the solid and robust upstream reserves within the industry chain, Tongwei entered the module business in 2013. The product is produced by the "Industry 4.0" system of smart manufacturing. Tongwei creates high-efficiency shingled and half-cell products to achieve all-round coverage.

When did Tongwei start manufacturing shingled modules?

The M3 Phase III project was put into operation in 2021, and the 210-series large-sized module was produced smoothly, marking the entry of the 6.0 era of modules. Tongwei entered the module business in 2013. In 2020, the G12 shingled module of 1.2GW was officially put into production, achieving a single module power output of up to 660W.

What is Tongwei polysilicon lead?

The quality, technical indicators and costs of Tongwei polysilicon lead globally, covering both electronic and solar grades. Tongwei has established strategic partnerships with several well-known downstream photovoltaic cell and module enterprises in China. The product quality has received high recognition in the market.

What is the quality of Tongwei crystalline silicon?

The product quality has received high recognition in the market. With a purity of 99.999999999%, the products represent the excellence of high-purity crystalline silicon "intelligent manufacturing in China". With the solid and robust upstream reserves within the industry chain, Tongwei entered the module business in 2013.

Are polycrystalline photovoltaic panels suitable for large-scale installation?

These modules are suitable for large-scale installation. Polycrystalline photovoltaic panels decrease the costs associated with solar power mainly by reducing production costs, improving silicon material use, and achieving economies of scale in large-scale production, while energy consumption and maintenance costs are reduced at the same time.
