

Yingli photovoltaic panel wiring

Where should Yingli Solar PV modules be mounted?

Yingli Solar PV modules must be mounted on appropriate installation structures positioned on suitable buildings, the ground, or other structures suitable for PV modules (e.g. carports, building facades or PV trackers). PV modules must not be mounted on moving vehicles of any kind.

What is included in the Yingli Solar PV module manual?

This manual contains important information pertaining to the electrical and mechanical installation and maintenance of PV modules, and contains safety information that you must read carefully and be familiar with before handling, installing, and/or maintaining Yingli Solar PV modules.

Do Yingli Solar PV modules corrode?

Although some types of Yingli Solar PV modules have passed the IEC 61701 salt-mist corrosion test with a salt concentration of 5% by weight, galvanic corrosion can occur between the aluminum frame of the PV module and installation or grounding hardware if such hardware is comprised of dissimilar metals.

Who is covered by the Yingli solar installation manual?

This manual applies to photovoltaic modules ("PV modules", also commonly known as solar panels) manufactured by Yingli Energy Development Company Limited ("Yingli Solar"), and is explicitly written for qualified professionals ("Installer" or "Installers"), including without limitation licensed electricians and RAL Certified PV Installers.

Are Yingli Solar PV modules fire resistant?

Yingli Solar PV Modules have a Class C fire resistance rating in accordance with the IEC 61730-2 certification. When PV modules are mounted on rooftops, the roof must have a fire resistant covering suitable for this application. PV modules are electrical generating devices that may affect the fire safety of a building.

Can Yingli Solar PV modules withstand snow?

Yingli Solar PV modules are designed to withstand high snow loads. However, if removing snow is desired to enhance production, use a brush to gently remove snow. Do not try to remove frozen snow or ice from PV modules. The dismantling of PV systems must be performed with the same care and safety precautions used during the initial installation.
